Owner WAGGING HEART KENNELS

OVC Case Number: N/A

I have reviewed the single ventrodorsal projection of the pelvis of the above-mentioned dog which you submitted which was made on November 13th, 2006 which was submitted for preliminary radiographic evaluation regarding hip dysplasia. I consider both coxofemoral joints to be within normal limits for a dog of this breed and age.

Thank you for referring this interesting radiograph. If I can be of any further assistance with this case, please do not hesitate to contact me.

Yours Sincerely,

Howard Dobson, B.V.M. & S., D.V.Sc., Cert. E.O., D.A.C.V.R.
